Yes. We are moving forward with our investigation and the superfund process. Enforcement continues to look for PRPs throughout the process, and will investigate if new information is found.

Thanks, Katrina!

For the second response, does that mean the progress of the assessment/cleanup will not be affected by the lack of/search for an RP?

Jennah, the meeting went well. We had about 15-20 folks. Fox 23 was there and interviewed ODEQ and EPA.

What is next at the superfund site? Will a crew be there sometime soon to do anything at all, put up signs? Check the property?

Currently, EPA and ODOEQ are sampling the residential yards located within the site boundary and near the site boundary. The sampling will help us identify any potential health risks that may exist. Once we receive the results, we will share the results with the property owner and discuss any concerns we may have.

Also, is the EPA going to now start cleaning up BEFORE figuring out the potential responsible parties?
At this time we do not have a responsible party for the Wilcox Site. The site will be federally funded.

And, I've heard the EPA may be adding to the current superfund site, specifically the land at the Ohio Oil site, which is nearby. Is that accurate? Will any additional land be added or is that under consideration?

The Ohio Oil Site is a separate site from the Wilcox Oil Company Superfund Site. At this time, ODEQ has contacted Marathon Oil and have asked them to step forward to address issues related to the site. The general boundary of the Wilcox Oil Site remains unchanged, however, should we discover that contamination associated with the site falls outside of these boundaries then the contaminated areas will be addressed as part of the site.

Hi Katrina—

How did the open house go? Maybe you spoke with Janna Clark of Fox 23 in Tulsa—she sent me a couple follow-up questions. Can you help with these?

What is next at the superfund site? Will a crew be there sometime soon to do anything at all, put up signs? Check the property?

Also, is the EPA going to now start cleaning up BEFORE figuring out the potential responsible parties?

And, I've heard the EPA may be adding to the current superfund site, specifically the land at the Ohio Oil site, which is nearby. Is that accurate? Will any additional land be added or is that under consideration?

Thanks,
Jennah Durant
